Subject: Dredging North of Sawyer Street Facility

Dave and/or Elaine:

Any chance you could forward the .xyz file for the bathymetric data available for the area that EPA wants the city to dredge north of the Sawyer Street facility?

We could also use a proposed dredge footprint, the location of the proposed bulkhead, as well as the locations of any sheet piles that are currently in place to facilitate hydraulic dredging right now in that cove area.

Finally, with regard to the pipeline that will be in the vicinity of the dredge area that the City is proposing for the rowing course boathouse boat basin, could you provide some geo-referenced location data for that line?

Thanks,

Chet Myers, P.E.

Subject: CAD cell graphic

Joe and Kristin - here's the graphic of a CAD cell that we discussed this afternoon. Let me know if you have any questions.

The power point file is attached at the end in case that helps.

Dave
